

Shadow Light

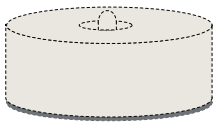

3DS-BU-086

PAGE 2 OF 2

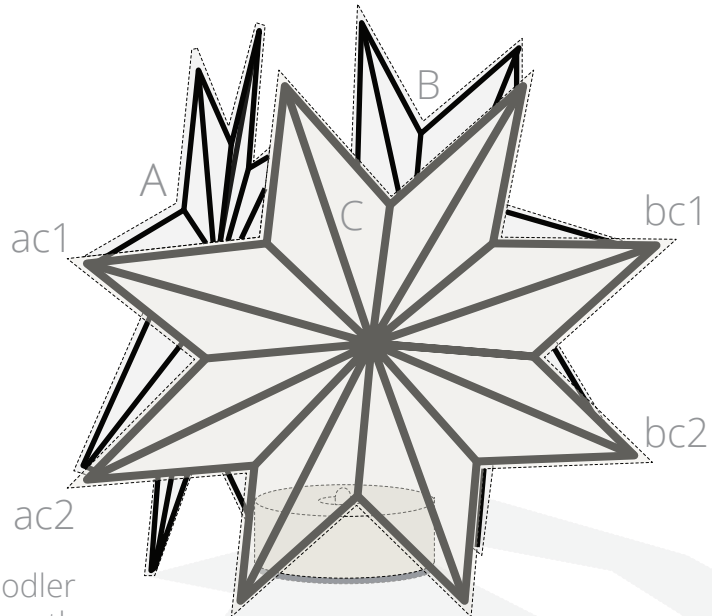

Cut around each face careful not to detach the plastic from the the paper.

Join at the points indicated by ac1, ac2, ab1, ab2, bc1 and bc2 (see page 1). Make sure that the translucent paper is on the outside of the construction.

Use a battery operated light source such as 5mm LED tealight as illustrated here.

Drop your 3Doodler construction over the light source and turn off the lights!
