

## Final

This tutorial will show you how I make small animals with the 3Doodler. It will use less than 1 Doodle Strand. It consists of four legs a body and a head and then can be made into any animal you want by adding ears, a tail, and a snout! Make two of each and put them on a doodled ark!

# Animals

By Louis

## Step 1

Start by making a small circle and slowly coiling upward. Make sure it sticks, you want it to stay there.

## Step 3

Begin connecting the legs and reinforce them together.

## Step 5

Pick an end and build up some plastic for the head.

## Step 2

When you get to the height you want, make three more. Make sure they all stick in place.

## Step 4

Keep building up the plastic to make the body bigger.

## Step 6

Add ears and a snout! Oink! Oink!

## Step 7

Don't forget the tail!

## Step 9

Or your very own doodle zoo! Trunk up for good luck!

## Done!

Now you can start that doodle farm you've always dreamed of!

## Step 10

You could make lions, tigers or bears! Oh my!
