

Final

Stencil

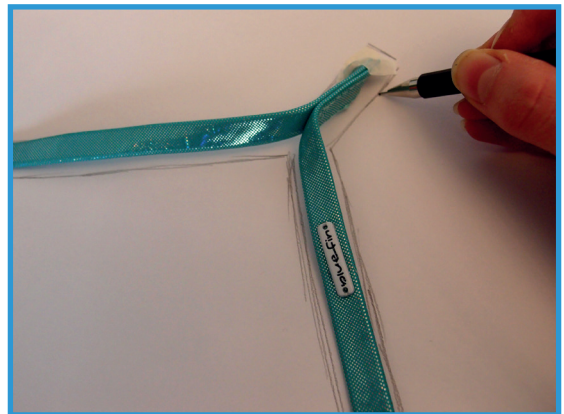

You'll need:

- time needed: about 1 1/2 hour for one flip flop
- about five strands of each: FLEXY key lime green, pineapple pow, pomegranade pow, awesome apricot and blueberry blue
- one pair of flip-flops, a hot glue gun

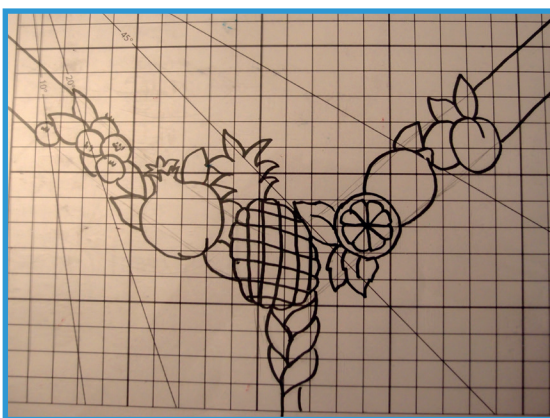

Steps

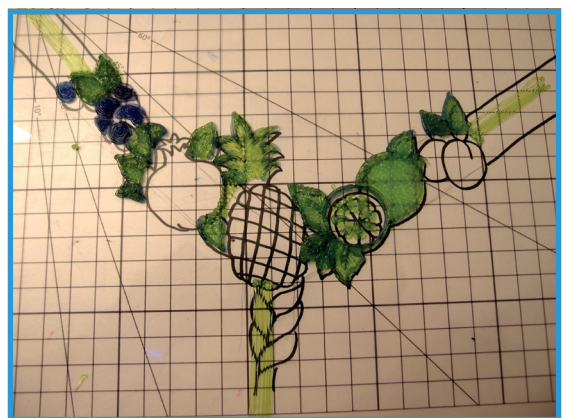

Take a pair of flip-flops and remove the straps.

Use the strap to outline the dimension of your foot size - the model was made with size 8,5 (USA; Europe: 39). Either drawing or the straps themselves will help you to adjust the doodle to your feet later.

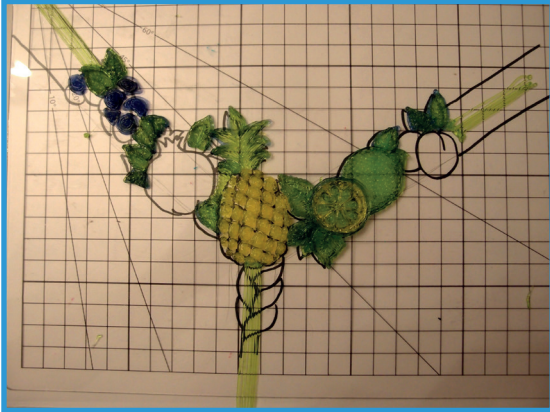

Print out the stencil. Use your Doodle Pad or cover the stencil with tape to be able to peel your doodle off afterwards!

Start drawing the doodle, using one colour after the other.

FLEXY Flip-Flops

Add strands to make the braids!

Now use your drawing or the old flip-flop strap to adjust the length of the braid to the size of your foot.

Use your hot-glue gun to fix the straps to the soles of the shoes. Now you're done!
