This tutorial will show you how I make small animals with the 3Doodler. It will use less than 1 Doodle Strand. It consists of four legs a body and a head and then can be made into any animal you want by adding ears, a tail, and a snout! Make two of each and put them on a doodled ark!
Step 1
Start by making a small circle and slowly coiling upward. Make sure it sticks, you want it to stay there.

Step 2
When you get to the height you want, make three more. Make sure they all stick in place.

Step 3
Begin connecting the legs and reinforce them together.

Step 4
Keep building up the plastic to make the body bigger.

Step 5
Pick an end and build up some plastic for the head.

Step 6
Add ears and a snout! Oink! Oink!
Animals
By Louis

Step 7
Don't forget the tail!

Step 9
Or your very own doodle zoo! Trunk up for good luck!

Done!
Now you can start that doodle farm you've always dreamed of!

Step 10
You could make lions, tigers or bears! Oh my!
